

# Heroes of Might and Magic 4

This article is not kept up to date anymore.

Go to [the Heroes of Might and Magic 4 page on ./play.it wiki](#) for the latest version of this guide.

version sold on GOG

- scripts:
  - *dead link removed*
  - *dead link removed*
- target:
  - `setup_homm4_complete_2.0.0.12.exe`
- dependencies:
  - `icoutils`
  - `innoextract`
  - `fakeroot`

The game installed via these scripts will use WINE.

## Usage

1. Download the scripts, and put them in the directory containing the installer:

```
ls
```

```
setup_homm4_complete_2.0.0.12.exe  play-heroes-of-might-and-  
magic-4_gog-2.0.0.12.sh  play-anything.sh
```

2. Install the scripts dependencies:

```
apt-get install icoutils innoextract fakeroot
```

3. Run the script:

```
sh ./play-heroes-of-might-and-magic-4_gog-2.0.0.12.sh
```

4. Wait a couple minutes, The script will end by giving you the commands to launch as root to install the game.

## Advanced usage

This script accept several options to set its behaviour. Follow the links to more details on how to use them.

## Play in a window

Like a lot of Windows games published before the 16:9/16:10 screens became “the norm”, Heroes of Might and Magic 4 display can get messed up on these. The following method will give you a way to run the game in a window to avoid this.

1. Run the following command to get acces to the configuration screen for the Heroes of Might and Magic 4 WINE prefix:

```
homm4-winecfg
```

2. In the configuration window, go on the “Graphics” tab;

3. Check “Emulate a virtual desktop”, and put your desktop resolution in the “Desktop size” fields;

4. Close the window with “OK”.

5. Done, from the next launch Heroes of Might and Magic 4 will run in a window that will automatically scale to its resolution. You can go back to fullscreen mode at any time by running the WINE configuration screen and uncheck “Emulate a virtual desktop”.
